- *1 Start/Stop a manual recording of a call
- *0 Disconnect from a call

Accessing your voicemail box

From a PrimoVoice Phone - Simply dial *55 from your PrimoVoice phone to access your personal mailbox (or you can also dial from anywhere else - 028890000)

Voicemail Star Access

Dial your own PrimoVoice number from any phone and wait for it to go to voicemail. When you start to hear the voicemail greeting press '*' and you will be prompted for your voicemail PIN code (must already be setup) - you will then be able to access your mailbox messages as normal. You can also setup calling numbers as trusted callers to avoid having to enter a PIN number.

Setting up your Voicemail greetings

Once you press '0' to access your voicemail greetings settings then you can select:

'1' - To setup your unavailable message

'2' - To setup your busy message

'3' - To setup your name

'4' - To setup a temporary greeting (i.e. on vacation for a while)

'5' - To change your PIN number.

Press '#' after recording and follow the prompts to listen to the recording and save it if you wish.

There are lots of things you can do in your voicemail box such as navigate messages, change folders, move messages between folders, forward messages, play back message details, return a call, place a new outgoing call and more... Here are the main menu options available to you when you connect to your mailbox:

Menu when not listening to messages:

'1' - Listen to messages in the currently selected folder. (New or old messages selected when you first connect)

'2' - Change your current message folder. ('0' for new messages, '1' for old messages, '2' for work messages, '3' for family messages, '4' for friends messages, '#' to cancel)

'3' - advanced options ('4' to place an outgoing call)

'0' - Mailbox options (record greetings and set PIN number)

'*' - Help

'#' - Exit

When listening to messages:

'3' - advanced options ('1' - send a reply if a primo user, '2' - call the person who left the message, '3' - listen to the message details, '4' - to place outgoing call)

'4' - Go back to the previous message

'5' - Repeat the current message

'6' - Play the next message

'7' - Delete the current message

'8' - Forward the message to another mailbox

'9' - Save the message to a folder ('0' for new messages, '1' for old messages, '2' for work messages, '3' for family messages, '4' for friends messages)

Number Porting

If you have an existing telephone number you can port (move) that number over and continue to use it. There is a charge for number porting (see the price card).

Number porting usually takes around 10 business days, but can take longer in some circumstances. We will liaise with you to ensure that the porting request is completed smoothly and with minimal disruption. Complex ports (such as port requests from 3rd party providers) require a longer notice period. Please contact us for more information if you have a complex port.

Porting Away

In the unlikely event that you need to move your number away from PrimoWireless please contact support@primowireless.co.nz and we will provide the information you need to provide to your gaining service provider for the port to be successfully approved.

Fax Line

If you would like to set up a dedicated fax line we can do this by simply signing you up to an additional dedicated line. Call the PrimoWireless Support to get set up.

Emergency Numbers

Although emergency numbers do work on the PrimoVoice service and like all mobile phones, we don't provide a dedicated emergency number service (like Telecom are paid to do) and cannot guarantee emergency calls. The operator will also not know your physical location due to the voice line running through the internet.

0900 Numbers

PrimoVoice does not currently support the calling of 0900 numbers.

Eftpos, Monitored Alarms, etc

The PrimoVoice lines are designed for voice calling only, so they are unable to support Eftpos, Monitored Alarms, Sky TV, etc
